

Introducing **TDK Mechanical Services (UK) Ltd's** new safety initiative: **Site Safe. All Safe.** This proactive strategy reinforces our commitment to workplace safety, compliance, and community well-being, aligning closely with current Construction (Design and Management) (CDM) regulations. **Site Safe. All Safe.** promotes a culture of vigilance, responsibility, and teamwork to protect our employees, clients, and everyone in the surrounding areas.

Key Elements of the Site Safe. All Safe. Initiative:

1. Empowered Reporting:

- **Site Safe. All Safe.** empowers our engineers to report any on-site issues that might pose risks, whether directly impacting their work or not. This initiative encourages our team to look beyond their immediate tasks and ensure the entire area around their work zone is secure.

2. Comprehensive Inspections:

- All areas of our work—whether domestic dwellings, commercial buildings, or industrial sites—will undergo thorough safety inspections. We're committed to maintaining the highest safety standards not only for our team but also for the residents, workers, and the community around us.

3. Collaborative Effort:

- Safety is a shared responsibility. We will work closely with stakeholders, community members, and our supply chain partners to ensure every location we operate in is left safe for all. This collaborative approach is integral to maintaining consistent safety standards and addressing concerns promptly.

4. Continuous Education and Compliance:

- As part of this initiative, our engineers will undergo regular training to stay informed about current CDM regulations and best practices in site safety. This ensures that everyone on-site is equipped with the knowledge and skills to identify potential hazards and act responsibly.

Why Site Safe. All Safe.?

At TDK Mechanical Services, we believe that **when the site is safe, we are all safe.** This initiative not only underscores our dedication to compliance with CDM regulations but also enhances our company's safety culture and aligns with our mission of leaving every workplace safer than we found it.

By embedding **Site Safe. All Safe.** in our day-to-day operations, we're setting a new standard for safety in our industry. Our ultimate goal is to foster a secure, trustworthy environment for everyone involved, and together, we can achieve this.

Site Safe. All Safe.
